## Education

Course	Insitute	Year	Result
B.Tech in CSE	Galgotias University, GREATER NOIDA	2026	60%
12 <sup>th</sup> GRADE	CMHS,GAYA(BIHAR)	2021	75%

## INTERNSHIP

### Coursera

Web Developer in Frontend

- Web development focuses on designing, creating, and maintaining websites or web applications.
- It includes frontend (UI/UX) and backend (server-side and database) development.
- Key technologies are HTML, CSS, JavaScript, and frameworks like React, Node.js, and Django.

## Projects

### • Resume

The project is a personal resume website built using HTML, CSS, and JavaScript. It features a clean and responsive layout, showcasing an introduction, education, internship experience, and project details. The site uses a structured table to display educational qualifications and interactive elements such as links and buttons for connecting with the user. CSS is utilized to create a visually appealing design with responsive tables, clear typography, and hover effects, while JavaScript enhances interactivity, adding an alert message when users click the "Connect with me" button. The project highlights Ayaz’s passion for web development..

### • Admission Form

The admission form project is an interactive web form created using HTML, CSS, and JavaScript. It allows users to input necessary details for admission purposes, such as personal information, academic history, and contact details. The form is structured with fields for easy data entry, while JavaScript handles form validation to ensure correct input. CSS is used to create a clean and professional design, ensuring the form is responsive and user-friendly across different devices. The project demonstrates a practical application of frontend technologies, focusing on user experience and data collection efficiency.
